 JUSTICE LEWIS F. POWELL, JR.

EPA Cases

75-909

Dear Chief:

We now have a letter, dated January 13, from Deputy Solicitor General Randolph purporting to respond to our request at oral argument for additional information. His letter identifies "the particular regulations at issue in these cases", and it is helpful to have his summary in this respect.

But his response falls considerably short of what I thought we had requested. The SG has made substantial concessions, indicating that the regulations that were before the several Courts of Appeals must be modified in light of these concessions. SG's Brief at 20, n. 14. I was interested - and understood that all of us were - in having the government indicate exactly how the regulations will be changed.

I can illustrate this by taking a look at Regulation 52.1095. This is listed on the second page of Mr. Randolph's letter as being at issue in the Maryland case. It is printed as Appendix A in the "Brief for the States" at p. 1a. You will note from the Regulation as printed (and which was the basis of CA4's decision) that it contains some very strong language. For example, it states (i) that Maryland "shall establish an inspection and maintenance program . . ."; (ii) "shall submit legally adopted regulations to the Administrator. . ."; (iii) the regulations "shall include . . . sanctions against individual owners and repair facilities"; (iv) the regulations also provide that the "enforcement program . . . shall include appropriate penalties for violation"; and (v) that the Governor [of Maryland] must submit a statement "identifying the sources and amounts of funds for the program," and if funds are not available under existing statutory authority "the text of needed legislation

- 2 -

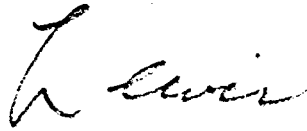

[also] shall be submitted." The foregoing is merely a rough summary of portions of the Regulation.

If I understand the extent of the SG's concessions, much of what I have noted above is no longer before us. I believe we will find the same situation with respect to many of the other regulations mentioned in Mr. Randolph's letter.

I would have thought that before we were asked to decide this case we would have something more specific than the general statements as to how the regulations will be amended. Normally we decide cases on the basis of statutes and regulations that were considered by the courts below.

I am inclined to think we should make a further request of the SG. Indeed, I am not at all sure that the case is in a posture for us to decide it intelligently.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lewis".

No. 75-909 EPA v. Brown

Dear Bill:

At the request of your Chambers, I have taken a look at your draft of 3/29 of a proposed Per Curiam in the above case.

I wonder whether it is necessary to go into detail as to why we are remanding these cases. What would you think of a fairly brief PC along the lines enclosed?

Sincerely,

Mr. Justice Rehnquist

[April —, 1977]

MR. JUSTICE STEVENS, dissenting.

The action the Court takes today is just as puzzling as the Government's position. Unless and until the Environmental Protection Agency rescinds the regulations in dispute, it is perfectly clear that the litigation is not moot. Moreover, an apparent admission that those regulations are invalid unless
